WATER_SYSTEM_NUMBER	Char	Public Water System ID for all public water systems.	CA1910044		N/A	Safe Drinking Water Information System (SDWIS)	N/A	N/A	Daily
SYSTEM_NAME	Varchar	The name of the water system.	GLENDORA-CITY, WATER DEPT.		N/A	Safe Drinking Water Information System (SDWIS)	N/A	N/A	Daily
REGULATING_AGENCY	Varchar	The Regulating Agency responsible for regulatory oversight of the water system.			N/A	Safe Drinking Water Information System (SDWIS)	N/A	N/A	Daily
COUNTY	Varchar	The county where a water system located.			N/A	Safe Drinking Water Information System (SDWIS)	N/A	N/A	Daily
FEDERAL_CLASSIFICATION_TYPE	Varchar	The type of system, based on population served based deliniations.	A public water system can be further classified as one of the following: C - Community Serves at least 15 service connections used by year-round residents or regularly serves 25 year-round residents. NTNC -Non-Transient Non-Community Serves at least the same 25 non-residential individuals during 6 months of the year. NC -Transient Non-Community Regularly serves at least 25 non-residential individuals (transient) during 60 or more days per year. This classification is based on information in each of the following five areas: 1. Quantity and type of population served (e.g., transient, residential). 2. Number of days served (or annual operating period (i.e., the period(s) of the year that the water system is in operation)). 3. Number of service connections (i.e., the number of connections for each service area such as commercial, agricultural, residential). 4. Activity status of the water system (i.e., active or inactive). 5. Sources of water (e.g., reservoir, well. Sources of water may be active or inactive depending on whether the source is seasonal or year-round. The current date determines active or inactive status)			N/A	Safe Drinking Water Information System (SDWIS)	N/A	N/A	Daily
SERVICE_CONNECTIONS	Numeric	The service connections is the number of connections served by the water system.			N/A	Safe Drinking Water Information System (SDWIS)	N/A	N/A	Daily
POPULATION	Numeric	The number of people served by the water system.			N/A	Safe Drinking Water Information System (SDWIS)	N/A	N/A	Daily
OWNER_TYPE	Varchar	The classification of the owner of the water system.			N/A	Safe Drinking Water Information System (SDWIS)	N/A	N/A	Daily
PL_ADDRESS	Varchar	Physical street location of a system.			N/A	Safe Drinking Water Information System (SDWIS)	N/A	N/A	Daily

PL_ADDRESS_ZIP_CODE	Varchar	Physical zipcode location of a system.			N/A	Safe Drinking Water Information System (SDWIS)	N/A	N/A	Daily
LATITUDE	Numeric	Latitude coordinate associated with the physical location of the water systems. Latitude is a geographic coordinate that specifies the north–south position of a point on the Earth's surface. Latitude is an angle which ranges from 0° at the Equator to 90° at the poles.			N/A	Safe Drinking Water Information System (SDWIS)	N/A	N/A	Daily
LONGITUDE	Numeric	Longitude coordinate associated with the physical location of the water systems. Latitude is a geographic coordinate that specifies the east-west position of a point on the Earth's surface.			N/A	Safe Drinking Water Information System (SDWIS)	N/A	N/A	Daily

SERVICE_AREA_ECONOMIC_STATUS	Varchar	The community economic status of the water system's service area. This economic status is determined by the State Water Board using the water system's coundary and U.S. Census income data. “Disadvantaged community” or “DAC” means the entire service area of a community water system, or a community therein, in which the median household income is less than 80% of the statewide annual median household income level. (Health & Saf. Code, § 116275, subd. (aa).) “Severely disadvantaged community” or “SDAC” means the entire service area of a community water system in which the MHI is less than 60% of the statewide median household income. MHI	Varchar	“Median household income” or “MHI” means the household income that represents the median or middle value for the community. The methods utilized for calculating median household income are included in Appendix A and Appendix E. Median household incomes in this document are estimated values for the purposes of this statewide assessment. Median household income for determination of funding eligibility is completed on a system-by-system basis by the State Water Board’s Division of Financial Assistance.			• Water system service area boundaries

CALENVIRO_SCREEN_SCORE	Varchar	CalEnviroScreen uses a suite of indicators to characterize pollution burden and population characteristics. Each indicator is assigned a score for each census tract in the state based on the most up-to-date suitable data. Scores are weighted and added together within the two groups to derive a pollution burden score and a population characteristics score. Those scores are multiplied to give the final CalEnviroScreen score. An area with a high score is one that experiences a much higher pollution burden than areas with low scores.	• CalEnviroScreen Score	• CalEnviroScreen 4.0 Report	N/A		**1/27/2025**	Yearly
